

GitHub SSH Setup & git-filter-repo Installation

1. Set Up SSH Key for GitHub

1. Open terminal or command prompt.
2. Generate SSH key:
`ssh-keygen -t ed25519 -C "your_email@example.com"`
3. Save the file with a unique name (e.g., `wellnesshub_ssh`).
4. Press Enter for no passphrase or enter a secure one.
5. Add SSH key to GitHub:
 - a. Copy contents of your public key (e.g., `wellnesshub_ssh.pub`).
 - b. Go to GitHub > Settings > SSH and GPG keys > New SSH key.
 - c. Paste and save.
6. Test connection:
`ssh -T git@github.com`

2. GitHub Repository Access URLs

- SSH URL: `git@github.com:wellnesshub-platform/wellnesshub_platform.git`
- HTTPS URL: `https://github.com/wellnesshub-platform/wellnesshub_platform.git`

3. Install git-filter-repo

For macOS:

`brew install git-filter-repo`

For Windows:

1. Download git-filter-repo from: <https://github.com/newren/git-filter-repo>
2. Extract the .zip or .tar.gz file.
3. Place the executable in your Git installation directory or ensure it's in your system PATH.
4. Verify with: `git filter-repo --version`
