

Instructions: Run Flutter UX App

1. Open Terminal and navigate to the ux folder inside the desired module.

Example: `cd /Users/himanshushukla/projects/wellnesshub_platform/mind/ux`

2. Run ``flutter pub get`` to fetch dependencies.
3. Make sure an emulator is running or a physical device is connected.
4. Run ``flutter run`` to launch the app.
5. To hot reload, use 'r'. To quit, use 'q' in the terminal.
